WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

REPORT NO. 183
PAGE 1

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

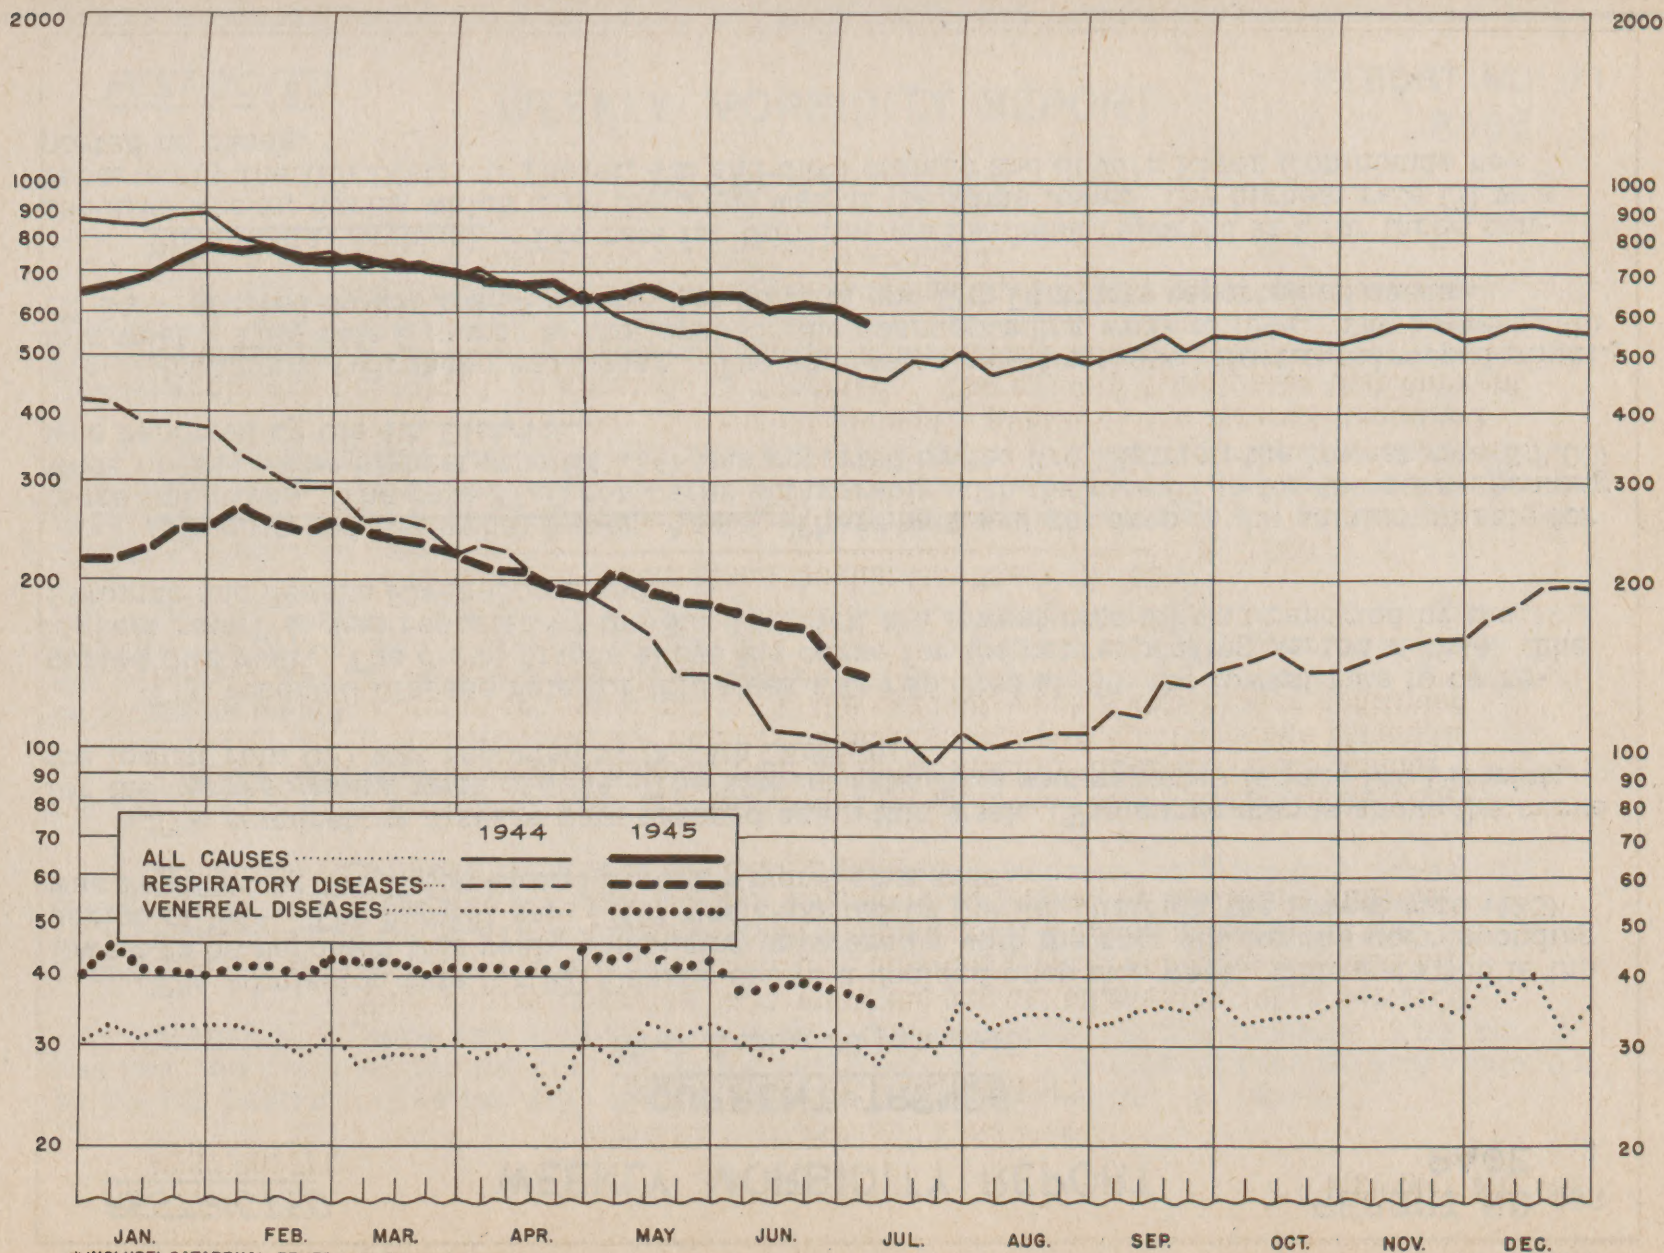

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

RESTRICTED

RATE PER 1,000

ANNUAL ADMISSION RATES PER 1,000 AVERAGE STRENGTH, BY WEEKS

CURRENT TRENDS

Week Ending 30 June 1945

The admission rate for All Causes shows a decided drop this week. This rate 585 is the lowest to be reported this year, comparing unfavorably with the rate 486 for the corresponding period of 1944. The highest rate (740) was reported by the 9th District; the lowest rate (426) was reported by the Potomac and Severn River Commands.

The respiratory disease rate dropped again this week. The curve stands above the curve for the corresponding week of 1944. The highest rate (255) was reported for the 9th District; the lowest rate (51) was reported by the 4th District.

The venereal disease rate for this week was reported at 36, the lowest rate to be reported this year. The curve stands above the curve for the corresponding period of 1944. The highest rate (74) was reported by the 8th District; the lowest rate (6) was reported by the Potomac and Severn River Commands.

Influenza and Catarrhal Fever, Acute. There was a slight drop in the admission rate for these infections. The rate 87.10 compares unfavorably with the rate 67.18 for the corresponding week of 1944. The highest rate (147.34) was reported by the 3rd District; the lowest rate (22.00) was reported by the 4th District.

Pneumonia--Broncho and Lobar. The admission rate for these infections dropped slightly this week. This rate 2 stands at the level for the corresponding week of 1944. The highest rate (7) was reported by the 3rd District. The 6th, 7th and 13th Districts reported no cases.

Pneumonia, Atypical. The rate for this disease has been reported at 2 for three consecutive weeks, during which time the trend was at the same level. The highest rate (7) was reported by the 11th District. The 1st, 4th and the Potomac and Severn River Commands reported no cases.

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The trend for these infections continues downward. The rate 47 compares unfavorably with the rate 34 for the corresponding period of 1944. The highest rate (119) was reported by the 9th District; the lowest rate (23) was reported by the 1st District.

Rheumatic Fever, Acute. The rate for this disease is reported again this week at 1. The curve stands below the curve for the corresponding week of 1944. The highest rate (3) was reported by the 1st and 9th Districts. The 7th District and the Potomac and Severn River Commands reported no cases.

Scarlet Fever. The rate for this disease was reported again this week at 5. The trend was upward in only two Districts, the 5th and 12th. The highest rate (28) was reported by the 9th District. The 1st, 4th, 6th and 7th Districts and the Potomac and Severn River Commands reported no cases.

Cerebrospinal Fever, Meningococcic. The admission rate for this disease was reported for the third consecutive week at 0.07. Only two Districts reported cases, the 5th and 12th.

Malaria. The admission rate for this disease was reported at 2 for four consecutive weeks. This rate stands at the level for the corresponding week of 1944. The highest rate (4) was reported by the 4th District. The Potomac and Severn River Commands reported no cases.

Measles. There was a slight drop in the admission rate for this disease. This rate 2 has reached the level for the corresponding period of 1944. The highest rate (9) was reported by the 9th District. The 1st, 4th, 6th, 7th and 13th Districts reported no cases.
